

CISCO PACKET TRACER - ONE PAGE MINIMAL CLI SHEET (UPDATED)

1) Switch - Base Checks

```
en | sh run | sh ? | conf t | hostname SW1 | end | sh run
```

2) Switch - Ports Speed/Duplex & MAC Table

```
en | conf t | int fa0/1 | duplex half | speed 10 | speed 100 | speed auto | duplex auto | end |  
sh int fa0/1 | sh int gi0/1 | sh mac-address-table |  
sh int fa0/1 | i address is | sh int gi0/1 | i address is
```

3) WLAN WPA2-PSK (verify)

```
ipconfig /all | ping 10.48.24.2 | sh ip int br
```

4) Two-PC Direct Connection

```
ipconfig | ping 192.168.10.2 | arp -a
```

5) HUB Exercise

```
ipconfig /all | ping <PC_IP>
```

6) Fault-Finding LAN

```
ipconfig | ping 172.16.65.2 | arp -a | sh int status | sh mac-address-table
```

7) Router - IP Network Plan

```
en | conf t | int fa0/0 | ip add <IP> <MASK> | no shut |  
int fa1/0 | ip add <IP> <MASK> | no shut |  
int fa2/0 | ip add <IP> <MASK> | no shut |  
end | sh ip int br | ping <other_net_PC>
```

8) Router - Configure Routing Table

```
# Static route
```

```
en | conf t | ip route <DEST_NET> <MASK> <NEXT_HOP_IP> | end  
sh ip route
```

```
# Connectivity test
```

```
ping <remote_ip> | traceroute <remote_ip>
```

QUICK GLOBAL RECAP

```
en | conf t | int fa0/x | duplex half|full|auto | speed 10|100|auto |  
no shut | end | sh run | sh int fa0/x | sh mac-address-table |  
sh ip int br | ipconfig /all | ping <ip> | arp -a
```
